ERRATA

In Table 6, pages 12, 19 and 21, certain land area and density figures were in error. The attached extracts include the corrected figures as they should have appeared.

Certaines erreurs se sont glissées dans les chiffres de la superficie et de la densité aux pages 12, 19 et 21 du tableau 6. Les pièces jointes présentent les chiffres corrigés, tels qu'ils auraient dû apparaître.

INTRODUCTION

This report provides final population counts of the 1976 Census for all municipalities, and for all census metropolitan areas (CMAs) and census agglomerations (CAs) with CMA-CA parts and component municipalities. The population counts from the 1971 Census, included for comparison purposes, have been adjusted to reflect the June 1, 1976 municipal limits, in cases where population has been affected by the annexation or loss of land through the alteration of municipal limits. Detailed descriptions of such alterations may be found in the annual publication, *Changes to municipal boundaries, status and names* (Catalogue No. 12-201).

Table 5 lists municipalities in alphabetical order, and gives a guide to the location of each as to province, census division, and census consolidated subdivision. The last, a term new to the Census, is defined below. When applicable, the census metropolitan area or census agglomeration in which a municipality falls is also indicated. Table 6 provides the breakdown of each census metropolitan area and census agglomeration into (a) its urbanized core (largest city and remainder) and fringe (urban part and rural part) and (b) its component municipalities. In addition, this table gives the percentage change in population between 1971 and 1976 and the land area and population density for each CMA-CA part and component municipality.

For 1976, 13 urban centres have been retired from the census agglomeration programme primarily because of changes in their municipal structure, while 14 centres have been added. The retired centres are: Happy Valley, Nfld.; Fredericton and St. Stephen, N.B.; Beauceville, Qué.; New Hamburg, Oshawa and Timmins, Ont.; Castlegar, Kamloops, Kelowna, Nanaimo, Prince George and Prince Rupert, B.C. The new centres are: Bay Roberts and Twillingate, Nfld.; Bathurst, Carleton Place and Edmundston, N.B.; Cap-aux-Meules, Ste-Adèle and Ste-Anne-des-Monts, Qué.; Brockville, Kingsville and North Bay, Ont.; Moose Jaw, Sask.; Duncan and Vernon, B.C. One centre, Oshawa, Ont., has been added to the census metropolitan area programme in 1976.

More detailed tables of data covering demographic and economic characteristics of individuals as well as characteristics of households, families and housing are provided for municipalities with a population of 5,000 and over in a related bulletin (Catalogue No. 92-810) and for census metropolitan areas and census agglomerations in another bulletin (Catalogue No. 92-809). A series of reference maps may be found in a third bulletin (Catalogue No. 92-811).

DEFINITIONS

Province: Major political division of Canada. From a statistical point of view, it is a basic unit for which data are tabulated and cross-classified. There are ten provinces which are divided into federal electoral districts, census divisions, census subdivisions, etc. In census publications, provincial tables include the Yukon and Northwest Territories.

Census Division (CD): General term applying to counties, regional districts, regional municipalities, etc. In Newfoundland, Manitoba, Saskatchewan and Alberta, the term describes geostatistical areas that have been created by Statistics Canada in co-operation with the province as an equivalent for counties.

Municipality: Area with corporate status governed by Provincial and Territorial Acts. These acts differ from province to province. Moreover, municipalities within each province vary in name, status, and administrative powers.

Ce bulletin présente les chiffres définitifs de population du recensement de 1976 pour toutes les municipalités, régions métropolitaines de recensement (RMR) et agglomérations de recensement (AR) ainsi que pour les parties de RMR-AR et les municipalités composantes. Les chiffres de population du recensement de 1971, qui sont indiqués à des fins de comparaison, ont été redressés en fonction des limites municipales au 1^{er} juin 1976 dans les cas où une annexion ou une perte de territoire résultant du changement des limites municipales a affecté la population. On trouvera une description détaillée de ces modifications dans la publication annuelle, *Changements de limites, de statut et de nom des municipalités* (n° 12-201 au catalogue).

Le tableau 5 donne la liste des municipalités en ordre alphabétique et indique pour chacune, la province, la division de recensement et la subdivision de recensement unifiée. Ce dernier terme, qui est un nouveau concept du recensement, est défini ci-après. La région métropolitaine de recensement ou l'agglomération de recensement dans laquelle est située chaque municipalité est également indiquée s'il y a lieu. Le tableau 6 donne la répartition de chaque région métropolitaine de recensement et agglomération de recensement selon a) le noyau urbanisé (la ville principale et le reste du noyau urbanisé) et la banlieue (partie urbaine et partie rurale) et b) ses municipalités composantes. Il donne en outre le taux de variation de la population entre 1971 et 1976 ainsi que la densité de la population et la superficie pour chaque partie de RMR-AR et chaque municipalité composante.

En 1976, 13 centres urbains ont été supprimés du programme des agglomérations de recensement surtout en raison des modifications qui ont été apportées à leurs structures municipales, alors que 14 centres ont été ajoutés. Voici la liste des centres supprimés: Happy Valley (T.-N.); Fredericton et St. Stephen (N.-B.); Beauceville (Qué.); New Hamburg, Oshawa et Timmins (Ont.); Castlegar, Kamloops, Kelowna, Nanaimo, Prince George et Prince Rupert (C.-B.). Les centres ajoutés sont: Bay Roberts et Twillingate (T.-N.); Bathurst, Carleton et Edmundston (N.-B.); Cap-aux-Meules, Ste-Adèle et Ste-Anne-des-Monts (Qué.); Brockville, Kingsville et North Bay (Ont.); Moose Jaw (Sask.); Duncan et Vernon (C.-B.). Oshawa (Ont.) est le seul centre qui a été ajouté au programme des régions métropolitaines de recensement en 1976.

Des données plus détaillées sur les caractéristiques démographiques et économiques des particuliers et sur les caractéristiques des ménages, des familles et du logement pour les municipalités de 5,000 habitants et plus figurent dans les tableaux d'un bulletin connexe (n° 92-810 au catalogue) et, pour les régions métropolitaines de recensement et les agglomérations de recensement, dans les tableaux d'un autre bulletin (n° 92-809 au catalogue). On trouvera une série de cartes de référence dans un troisième bulletin (n° 92-811 au catalogue).

DÉFINITIONS

Province: Principale division politique du Canada. Du point de vue statistique, c'est une unité de base pour laquelle toutes les données sont totalisées et recoupées. Il y a dix provinces, divisées en circonscriptions électorales fédérales, en divisions de recensement, en subdivisions de recensement, etc. Dans les publications du recensement, les tableaux relatifs aux provinces comprennent le Yukon et les Territoires du Nord-Ouest.

Division de recensement (DR): Terme générique qui désigne les comtés, les districts régionaux, les municipalités régionales, etc. À Terre-Neuve, au Manitoba, en Saskatchewan et en Alberta, l'expression désigne les unités géostatistiques créées comme équivalent des comtés et délimitées par Statistique Canada en collaboration avec les provinces.

Municipalité: Territoire constitué en corporation, régi par des lois provinciales et territoriales. Les lois diffèrent d'une province à l'autre. De plus, dans chaque province, les municipalités ont des appellations, des statuts et des pouvoirs administratifs différents.

DEFINITIONS — Continued

Census Subdivision (CSD): General term applying to municipalities, Indian Reserves, unorganized territories and subdivisions. In Newfoundland, Nova Scotia and British Columbia, the term also describes geostatistical areas that have been created by Statistics Canada in co-operation with the province as an equivalent for municipalities. It should be noted that the parts of Flin Flon falling in Manitoba and Saskatchewan, and the parts of Lloydminster falling in Saskatchewan and Alberta are treated as separate CSDs.

Census Subdivision Type: Census subdivisions (CSDs) are classified into various types, according to official designations adopted by provincial or federal authorities. With the exception of unorganized territories and Indian Reserves, the type indicates the municipal status of the CSD. The following list indicates the abbreviations used for the most common CSD types:

BOR	Borough
C	City — Cité
DM	District Municipality — Municipalité de district
HAM	Hamlet — Hameau
ID	Improvement District — District d'amélioration
LGC	Local Government Community — Centre d'administration locale
LGD	Local Government District — District d'administration locale
LID	Local Improvement District — District d'amélioration locale
MD	Municipal District — District municipal
MUN	Municipality — Municipalité
PAR	Parish — Paroisse
RD	Rural District — District rural
RM	Rural Municipality — Municipalité rurale
SV	Summer Village — Village d'été
TM	Township Municipality — Municipalité de township
T-V	Town — Ville
V/C	Ville/Cité
VL	Village

Indian Reserve: Territory, mostly rural and varying in size, that belongs to an Indian tribe according to treaties between the Federal Government and the Indians. It is excluded from local jurisdiction and administered by the Federal Department of Indian and Northern Affairs.

Unorganized Territory: An area without municipal organization, directly administered by the province or, when applicable, by the county. Such areas are generally characterized by large tracts of land with low population density.

Census Consolidated Subdivision (CCS): Geostatistical area constituted by grouping all the census subdivisions (CSDs) located geographically within the boundaries of a large CSD. A large CSD having no other CSD within its boundaries is considered to be one census consolidated subdivision. CCS is similar in function to "Reference Code" in the 1971 Census.

Census Metropolitan Area (CMA): The main labour market area of an urbanized core (or continuous built-up area) having 100,000 or more population. CMAs are created by Statistics Canada and are usually known by the name of their largest city. They contain whole municipalities (or census subdivisions). CMAs are comprised of (1) municipalities completely or partly inside the urbanized core, and (2) other municipalities, if (a) at least 40% of the employed labour force living in the municipality works in the urbanized core, or (b) at least 25% of the employed labour force working in the municipality lives in the urbanized core.

DÉFINITIONS — suite

92-806

Subdivision de recensement (SDR): Terme générique désignant les municipalités, les réserves indiennes, les territoires non municipalisés et les subdivisions de recensement. À Terre-Neuve, en Nouvelle-Écosse et en Colombie-Britannique, l'expression désigne également des unités géostatistiques créées comme équivalent des municipalités et délimitées par Statistique Canada en collaboration avec la province. Il est à noter que les parties de Flin Flon qui se trouvent au Manitoba et en Saskatchewan, et celles de Lloydminster qui se trouvent en Saskatchewan et en Alberta sont considérées comme des subdivisions de recensement distinctes.

Catégorie de subdivision de recensement: Les subdivisions de recensement sont classées en diverses catégories selon les appellations adoptées par les autorités provinciales ou fédérales. À l'exception des territoires non municipalisés et des réserves indiennes, la catégorie indique le statut d'une subdivision de recensement. Voici la liste des abréviations des catégories de subdivision de recensement les plus courantes:

Réserve indienne: Territoire, le plus souvent rural et de taille variable, qui appartient à une tribu indienne en vertu de traités conclus entre le gouvernement fédéral et les Indiens. Il échappe à la compétence des autorités locales et est administré par le ministère des Affaires indiennes et du Nord canadien.

Territoire non municipalisé: Région sans organisation municipale, administrée directement par la province ou, le cas échéant, par le comté. Ces régions sont généralement caractérisées par leur vaste étendue et par la faible densité de leur population.

Subdivision de recensement unifiée (SRU): Unité géostatistique formée par le groupement de toutes les subdivisions de recensement situées à l'intérieur des limites d'une grande subdivision de recensement. On considère qu'une grande subdivision de recensement est une subdivision de recensement unifiée même si elle ne renferme pas d'autre subdivision de recensement. La subdivision de recensement unifiée joue le rôle du code de référence dans le recensement de 1971.

Région métropolitaine de recensement (RMR): Principal marché du travail d'un noyau urbanisé (ou d'une zone bâtie en continu) comptant 100,000 habitants et plus. Les RMR sont créées par Statistique Canada et sont ordinairement désignées par le nom de la ville principale. Elles renferment des municipalités (ou des subdivisions) entières. Une RMR comprend (1) les municipalités qui se trouvent en totalité ou en partie à l'intérieur du noyau urbanisé et (2) d'autres municipalités, a) si au moins 40 % de la population active occupée demeurant dans la municipalité travaille dans le noyau urbanisé ou b) si au moins 25 % de la population active occupée travaillant dans la municipalité demeure dans le noyau urbanisé.

DEFINITIONS — Continued

Census Agglomeration (CA): A geostatistical area created by Statistics Canada comprised of at least two adjacent municipal entities. These entities must be at least partly urban and belong to an urbanized core having a population of 2,000 or more. The urbanized core includes a largest city and remainder, each with a population of 1,000 or more, and has a population density of at least 1,000 per square mile (386 per square kilometre). CAs with an urbanized core of 100,000 or more (based on previous census figures) are called census metropolitan areas.

Component: The municipality or census subdivision building-block of a census metropolitan area or a census agglomeration.

CMA — CA Part: Census metropolitan areas (CMAs) and census agglomerations (CAs) are divided into four parts: largest city, remainder of urbanized core, urban fringe and rural fringe. The parts are always made up of complete enumeration areas, but often comprise only parts of municipalities. Not all four parts will necessarily be found in each CMA or CA.

Urbanized Core: Continuous built-up area including the largest city and, where applicable, the urban part of surrounding municipalities. To be considered as continuous, the built-up area must not have a discontinuity exceeding one mile (1.609 kilometres).

Largest City: Most populated municipality around which a census metropolitan area (CMA) or a census agglomeration (CA) is delineated. It is automatically part of the urbanized core. Usually its name is used as the name of the CMA or CA.

Remainder (of urbanized core): Part of the urbanized core of a census metropolitan area or of a census agglomeration located outside of the largest city. It is always comprised of complete enumeration areas, but not necessarily complete census tracts or complete census subdivisions (municipalities).

Fringe: Part of a census metropolitan area (CMA) or of a census agglomeration (CA) outside the urbanized core. The fringe consists of urban parts and rural parts which may cut across municipalities but never across enumeration areas. The concept of fringe is more restrictive in CAs than in CMAs. In a CA, the fringe is composed of the remaining part of municipalities having a part in the urbanized core, while in a CMA, the fringe comprises all the municipalities surrounding the core which meet the established criteria for inclusion in the fringe.

Urban Area: Area having a population concentration of 1,000 or more and a population density of 1,000 or more per square mile (386 per square kilometre).

Rural Area: All territory lying outside "Urban Areas".

Urban Population: Persons living in an area having a population concentration of 1,000 or more and a population density of at least 1,000 per square mile (386 per square kilometre).

Rural Population: Persons living outside "Urban Areas".

DÉFINITIONS — suite

92-806

Agglomération de recensement (AR): Unité géostatistique créée par Statistique Canada et composée d'au moins deux municipalités voisines. Ces municipalités doivent être au moins partiellement urbaines et faire partie d'un noyau urbanisé dont la population est de 2,000 habitants et plus. Le noyau urbanisé comprend la ville principale et le reste du noyau urbanisé ayant chacun une population de 1,000 habitants et plus, et dont la densité est d'au moins 1,000 habitants au mille carré (386 au kilomètre carré). Les AR dont le noyau urbanisé comprend 100,000 habitants et plus (selon les chiffres du recensement précédent) s'appellent des régions métropolitaines de recensement.

Composante: Une municipalité ou une subdivision de recensement faisant partie d'une région métropolitaine de recensement ou d'une agglomération de recensement.

Partie de RMR — AR: Les régions métropolitaines de recensement (RMR) et les agglomérations de recensement (AR) sont divisées en quatre parties: la ville principale, le reste du noyau urbanisé, la banlieue urbaine et la banlieue rurale. Ces parties sont toujours formées de secteurs de dénombrement entiers, mais ne comprennent souvent que des parties de municipalités. Toutes les RMR et AR ne comprennent pas forcément ces quatre parties.

Noyau urbanisé: Zone bâtie en continu comprenant la ville principale et, le cas échéant, la partie urbaine des municipalités environnantes. Pour être considérée comme continue, une zone bâtie ne doit pas comporter d'espaces libres de plus d'un mille (1.609 kilomètres).

Ville principale: Municipalité la plus peuplée d'une région métropolitaine de recensement (RMR) ou d'une agglomération de recensement (AR). Elle fait nécessairement partie du noyau urbanisé. Ordinairement son nom désigne la RMR ou l'AR.

Reste (du noyau urbanisé): Partie du noyau urbanisé d'une région métropolitaine de recensement ou d'une agglomération de recensement située en dehors de la ville principale. Elle comprend toujours des secteurs de dénombrement entiers, mais pas nécessairement des secteurs de recensement entiers ni des subdivisions de recensement ou municipalités entières.

Banlieue: Partie d'une région métropolitaine de recensement (RMR) ou d'une agglomération de recensement (AR) située en dehors du noyau urbanisé. La banlieue est formée de parties urbaines et de parties rurales qui peuvent comprendre des parties de municipalités, mais qui sont toujours formées de secteurs de dénombrement entiers. La notion de banlieue est plus restrictive dans le cas de l'AR que dans celui de la RMR. Dans une AR, la banlieue est composée du reste des municipalités dont une partie se trouve dans le noyau urbanisé, tandis que dans une RMR, la banlieue comprend toutes les municipalités situées aux alentours du noyau urbanisé et qui répondent aux critères établis pour faire partie d'une banlieue.

Région urbaine: Région dont la concentration démographique est de 1,000 habitants ou plus et dont la densité de population est de 1,000 habitants ou plus au mille carré (386 au kilomètre carré).

Région rurale: Tout territoire situé en dehors des "régions urbaines".

Population urbaine: Toutes les personnes demeurant dans une région dont la concentration de population est de 1,000 habitants ou plus et la densité d'au moins 1,000 habitants au mille carré (386 au kilomètre carré).

Population rurale: Personnes demeurant en dehors des "régions urbaines".

DEFINITIONS — Concluded

Enumeration Area (EA): The spatial unit canvassed by one Census Representative. It is defined according to the following criteria: (1) Population — An enumeration area may include as many as 375 households, depending on its location; (2) Number of Farms — An enumeration area always includes fewer than 100 farms; (3) Limits — An enumeration area, being the building-block of all geostatistical areas, never cuts across any area recognized by the census. Moreover, enumeration area boundaries are such that the Census Representative will be able to locate them without difficulty as, for example, streets, roads, railways, rivers and lakes. Enumeration areas are normally the smallest geographic units for which census data are available.

SAMPLING AND WEIGHTING

The information in this report was collected on a 100% basis and as such represents the official census counts. All table headings are noted accordingly.

COVERAGE ERROR

A coverage error occurs in the census whenever a person or a household is missed completely or counted more than once. Since overcoverage is fairly rare in relation to undercoverage, the net effect of such errors is to introduce a downward bias in census figures, so that the published census estimates tend to underestimate the actual population.

A special study was undertaken in relation to the 1971 Census to measure the extent of the bias due to undercoverage. This study estimated the over-all undercoverage rate to be of the order of 2% of the total population for persons and 1.5% for households. It also indicated that undercoverage is higher in certain segments of the population, e.g., young male adults, recent immigrants, the unemployed, etc. Similar trends were obtained in connection with the 1966 Census.

Comparable studies were undertaken for the 1976 Census but the results were not available at the time this report was published. Further details may be obtained by contacting Census Information Services.

SYMBOLS

.. figures not available.

... figures not appropriate or not applicable.

- nil or zero.

— amount too small to be expressed.

DÉFINITIONS — fin

92-806

Secteur de dénombrement (SD): L'unité spatiale recensée par un représentant du recensement. Elle est définie suivant les critères suivants: (1) Population — un secteur de dénombrement peut comprendre jusqu'à 375 ménages, selon sa localisation; (2) Nombre de fermes — Un secteur de dénombrement comprend toujours moins de 100 fermes; (3) Limites — Un secteur de dénombrement, étant l'unité de base de toutes les unités géostatistiques, ne déborde jamais une région reconnue par le recensement. Par ailleurs, les limites des secteurs de dénombrement sont telles que le représentant du recensement est en mesure de les localiser sans difficulté, par exemple, rues, chemins, voies ferrées, rivières et lacs. Les secteurs de dénombrement constituent normalement les plus petites unités géographiques pour lesquelles on peut obtenir des données de recensement.

ÉCHANTILLONNAGE ET PONDÉRATION

Les renseignements de la présente publication ont été recueillis à 100 % et représentent les chiffres officiels de recensement. Les titres des tableaux sont annotés en conséquence.

ERREUR DE COUVERTURE

Une erreur de couverture se glisse chaque fois qu'une personne ou un ménage sont omis ou comptés plus d'une fois. Étant donné que le surdénombrement est assez rare par rapport au sous-dénombrement, les erreurs de couverture introduisent un biais vers le bas dans les estimations du recensement de sorte que ces dernières ont tendance à sous-représenter la population réelle.

On a entrepris une étude spéciale concernant le recensement de 1971 afin de mesurer l'importance des biais attribuables au sous-dénombrement. On a établi que le taux global de sous-dénombrement était de l'ordre de 2 % pour ce qui est des personnes et de 1.5 % pour les ménages. On a également constaté que le sous-dénombrement est plus important dans certains segments de la population (par exemple, les jeunes hommes, les nouveaux immigrants et les chômeurs). Des tendances semblables ont été observées dans le cas du recensement de 1966.

On a entrepris des études du même genre pour le recensement de 1976, mais les résultats n'étaient pas prêts au moment de mettre ce bulletin sous presse. On peut obtenir plus de renseignements en s'adressant à Information recensement.

Publications of the 1976 Census of Canada

This bulletin is one of a series of volume reports of the 1976 Censuses of Population, Housing and Agriculture.

Most of the bulletins in the regular Volume Series are data-oriented. Other reports containing more methodological, interpretative and evaluative content, are also issued. These are as follows:¹

- (a) 1976 Census Administrative Report
- (b) 1976 Census Quality of Data Series
- (c) 1976 Census Research Series
- (d) Introductory Reports to each of the regular Volume Series.

Also available on request is a series of Reference Lists developed largely for internal verification of basic geographical and population hierarchies, which could provide useful information to the outside user.

Users will note that the majority of census publications are colour-coded to identify with the four themes central to the presentation and to maintain comparability with the 1971 series, e.g., blue for Geographical and Demographic content, brown for Housing, Household and Family data, red for Economic Characteristics and gold for the series based on Agriculture.

These reports are listed in the *1976 Census Catalogue* which can be obtained free of charge from:

Publications Distribution,
Room 1200, Statistics Canada,
Ottawa, Ontario.
K1A 0T6

To order census publications, send a cheque or money order made payable to the Receiver General for Canada, to the above address.

In addition to published documents, the Census of Canada can provide other products and services about census: data on microform (film or fiche), computer tapes, computer print-outs, user-specified tables, maps, geographic files, geographic lists, etc.

For information write:

Census Information Services,
Statistics Canada,
Ottawa, Ontario.
K1A 0T7

or call (613) 996-5254.

Inquiries about census and other Statistics Canada information can also be directed to Statistics Canada Regional Offices located in: St. John's (Nfld.), Halifax, Montréal, Ottawa, Toronto, Winnipeg, Regina, Edmonton and Vancouver.

¹ It should be noted that these publications are generally released somewhat later than the data reports.

Publications du recensement du Canada de 1976

Ce bulletin fait partie de la série des publications des recensements de 1976 de la population, du logement et de l'agriculture.

La plupart des bulletins de la série ordinaire des volumes présentent des données. On publie également d'autres bulletins dont le contenu vise plutôt la méthodologie, l'interprétation et l'évaluation. Ces bulletins sont les suivants¹:

- a) Rapport administratif du recensement de 1976
- b) Série relative à la qualité des données du recensement de 1976
- c) Série du recensement de 1976 relative à la recherche
- d) Introductions à chacune des séries ordinaires des volumes.

Vous pouvez aussi vous procurer sur demande une série de Listes de référence, servant surtout à la vérification interne des catégories géographiques et démographiques de base, qui pourraient fournir des renseignements utiles aux utilisateurs à l'extérieur de Statistique Canada.

Les utilisateurs constateront que la plupart des publications du recensement sont classées par couleur, chaque couleur correspondant à l'un des quatre thèmes du recensement; cela permet d'assurer la comparabilité avec les séries de 1971; ainsi, le bleu est réservé aux publications de nature géographique et démographique, le brun, aux bulletins sur le logement, les ménages et les familles, le rouge, aux publications de nature économique et la couleur or, à la série relative à l'agriculture.

Ces bulletins figurent au *Catalogue du recensement de 1976* que vous pouvez obtenir gratuitement auprès de:

Distribution des publications
Pièce 1200, Statistique Canada
Ottawa (Ontario)
K1A 0T6

Envoyez vos commandes de publications du recensement à cette même adresse en y joignant un chèque ou un mandat postal à l'ordre du Receveur général du Canada.

Outre les publications, le Recensement du Canada offre divers autres produits et services: données en microcopie (film ou fiche), bandes pour ordinateurs, états mécanographiés, totalisations spéciales, cartes, fichiers et listes géographiques, etc.

Pour obtenir des renseignements, écrivez à:

Information recensement
Statistique Canada
Ottawa (Ontario)
K1A 0T7

ou téléphonez au numéro (613) 996-5254.

Toute demande de renseignement sur le recensement et les autres données de Statistique Canada peut également être transmise aux bureaux régionaux de Statistique Canada situés à St. John's (T.-N.), Halifax, Montréal, Ottawa, Toronto, Winnipeg, Regina, Edmonton et Vancouver.

¹ Il convient de remarquer que ces bulletins sont généralement publiés quelque temps après les bulletins présentant des données.
